1. Connect provided power cord to the power inlet of the DS-EQ2, and attach to an appropriately grounded mains socket.
2. Attach left (L) and right (R) input audio channels along with the ground connector from the DS-EQ2 to the turntable that has the DS Audio cartridge installed, using the appropriate interconnects.
3. Attach left (L) and right (R) DS-EQ2 output audio channels to your stereo pre-amplifier using the appropriate interconnects.
4. When turned on using the main power switch, the DS-EQ2 will default to cartridge power ON (cartridge power LED will be blue) and the filter set to standard DS Audio response (filter select LED not be lit).
